The Job:	The Job:	
Sports development officers are responsible for generating interest and increasing participation in sports by running initiatives that inspire people to take part. A keen interest in sport and strong leadership and organisational skills are essential.	Sport and exercise scientists work to improve their clients' sporting performance and general health by applying scientific knowledge from areas such as physiology, biomechanics and psychology. Exercise Physio tend to specialise in different areas.	A physiotherapist's job is to treat people who have problems caused by illness, accidents or ageing.  Overall, physiotherapists are concerned with problems that affect muscles, bones, joints, heart, lungs and the nervous system.
